Statement on the use of biodiesel B100 meeting EN14214 specifications in JCB Stage V diesel engine range from 68-129kW in the United Kingdom and European Union

The JCB Stage V diesel engine range from 68k-129 kW is capable of operation using biodiesel B100 meeting EN14214 specifications. However, due to the nature of this fuel, enhanced servicing of the engines is needed to maintain proper engine condition, functionality, and manufacturer's warranty. The enhanced servicing package can be offered by JCB through its dealer network and the warranty on the engines will only apply when the enhanced service regime is adhered to. Please consult JCB for details of enhanced service package.

Note: Whilst the engines are Stage V certified they cannot be type-approved on B100 fuel. Therefore, the use of this fuel means that the engines will not be operating in compliance with the UK/EU emissions standards.

Yours faithfully
