Dear Mr Robert Hart,

My company (fryclean uco) have been collecting used cooking oils for over 30 years. We have expanded our client base during this time to give national coverage (via a group of companies), we pride ourselves on keeping our carbon footprint as neutral as possible by giving a local service nationally.

Our collections and therefor sales are entirely UK based.

We only collect UK derived materials, so I can confirm that 100 percent of the feedstock (used cooking oil) we supply to you (syntech biofuel ltd) is entirely of UK origin.

We are registered with ISCC (international sustainability and carbon certification) as a trading company entirely of UK origin.

We feel it is important to keep the impact of sustainable fuels to a minimum, this is why as a company (fryclean uco) will be proud to run our entire fleet of vehicles on syntech biofuel helping us reduce the emissions of the feedstock collections.

Kind Regards

Mr David Howard
